

Investment Profile

Investment Manager:	Fairtree Asset Management
Risk Profile:	Medium to High
Investment Horizon:	5 years
Platform availability:	RMB
Total number of holdings:	5
Benchmark:	(ASISA) South African MA Medium Equity

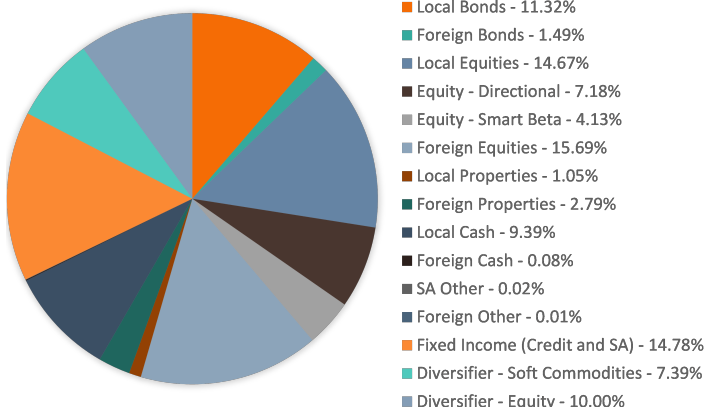

Investment Objectives

The Fairtree Balanced Multi Manager aims to provide a moderate risk return profile, from a diversified and balanced range of asset classes. The portfolio aims to outperform the benchmark net of investment fees over a rolling five year period. This is achieved by blending together a collection of the best asset classes and fund selection ideas into a diversified portfolio which invests across a range of active and passive strategies. Blending equity index and inflation returns with alpha from other sources provides the the portfolio with an excellent core, around which satellite positions are added to enhance diversification and portfolio balance.

Against the general expectation, but as was the case in late 2018, Moody's credit agency again decided to skip (as they are entitled to do) a scheduled pronouncement on SA's sovereign credit rating on Friday. This implies that the rating remains at one notch above sub-investment grade, with a stable outlook. Domestic financial markets responded positively to the news. Although Moody's reprieve is cause for relief, the current environment of weak SA real GDP growth and numerous fiscal risks, suggest that the risk of a rating outlook change and ultimately a credit downgrade will remain in the foreseeable future. Before the Moody's decision, the Monetary Policy Committee (MPC) decided to keep the repo rate unchanged. Other domestic news included an acceleration in producer inflation, an improvement in employment numbers and a modest trade surplus in February.

During the month, the local Equity market gained 1.6% in March and 8.0% in the first quarter, almost recovering the losses experienced in 2018. Resources, the best performing sector, gained 4.6% while Financials lost 4.8%. In line with Emerging market currency weakness, the Rand weakened 2.9%. Bonds were up 1.3% while Property lost 1.5% for the month. The best performing shares were dominated by rand hedges such as British American Tobacco (18.7%), MTN (10.1%), Naspers (9.4%) and BHP Group (8.8%). Amongst the worst performing shares were financial companies such as Absa (-15.8%), Nedbank (-11.7%) and Discovery (-10.6%). Aspen, the worst performing share, plunged 33% following poor results and cashflow concerns.

In the US, the headline ISM Manufacturing number rebounded in March to 55.3 from 54.2, beating expectations of 54.5. The new orders component also gained momentum, even against inventories. An improving new orders-to-inventories ratio is one of the most positive signals for growth and stocks one can envision. This suggests that U.S. growth is in the process of turning the corner, and the recent batch of poor news is arriving to an end.

China's closely watched PMI manufacturing gauges rebounded more sharply than expected in March, adding to the market narrative that the worst may be over for the world's second-largest economy. Both the small and medium sized enterprise-focused private PMI (50.8 vs. consensus 50.0) and the state-owned-enterprise heavy official gauge (50.5 vs. consensus 49.5) returned to expansionary territory. Markets rallied on the turn in business sentiment, with the Hang Seng China Enterprise index rising 1.7% and the onshore CSI 300 adding another 2% to reach a one-year high. Chinese growth is now showing signs of having bottomed out.
