

Fairtree Assegai Equity Long Short SNN QI Hedge Fund

Minimum Disclosure Document - Class 2

31 May 2019

Fund Profile & Investment Policy

The fund is a directionally biased Long / Short equity fund which will not hesitate to capture equity market beta when conditions allow for it.

Investment Strategy

The portfolio is managed as a long/short hedge fund, focused on extracting alpha returns from the South African equity market. The fund's returns are delivered through fundamental knowledge of South African equities vis-à-vis economic growth and broad economic themes as well as medium to long-term relative valuation opportunities, generating the largest portion of its returns through its directional bias. Relative value pairs, together with absolute longs and shorts seek to stabilize returns in turbulent market conditions, supported by the adjustment to the net exposure.

Investment Mandate

The portfolio may use leverage to a maximum of 4.5 times the net asset value of the portfolio. However, the portfolio has set an internal limit to use leverage up to a maximum of 3.5 times the net asset value. Excluded from this calculation shall be the investments in the portfolio solely used to enhance the interest earned by the portfolio.

Mandate limits and constraints:

- The portfolio is precluded from raising any debt funding over and above that achieved in terms of the long/short process;
- No net individual equity position shall exceed 15% of capital;
- Directional exposure limit to 120% of current underlying capital on the long side and up to 20% of current underlying capital on the short side;
- The portfolio shall at all times hold a minimum of 10 equity positions; and
- The portfolio will limit exposure to equities based upon liquidity.

*The inception date for the portfolio is 1 May 2012. The historical performance figures until the end of 30 September 2016 reflect performance achieved prior to CISCA regulation. The portfolio has been transitioned under CISCA regulations on 1 October 2016 and has since been managed as a regulated product. The annualized total return is the average return earned by an investment each year over a given time period, since date of the launch of the fund. Actual annual figures are available from the manager on request. The highest and lowest 1 year returns represent the highest and lowest actual returns achieved during a 12 month rolling period year since the original launch date of the portfolio. The performance figures given show the yield on a Net Asset value ("NAV") basis. The yield figure is not a forecast. Performance is not guaranteed and investors should not accept it as representing expected future performance. Individual investor performance may differ as a result of initial fees, time of entry/actual investment date, date of reinvestment, and dividends withholding tax. Performance is calculated for a lump sum investment on a Net Asset Value basis. The performance figures are reported net of fees with income reinvested.

Risk Profile

Risk Level:	Low	Low-Medium	Medium	Med-High	High
--------------------	------------	-------------------	---------------	-----------------	-------------

The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including liquidity risk, credit risk, market risk, and settlement risk. Sanne Management Company (RF) (Pty) Ltd, ("the manager"), and the investment manager do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial adviser.

Portfolio Valuation & Transaction Cut-Off

Portfolios are valued monthly. The cut off time for processing investment subscription is 10:00am on the last day of the month prior to enable processing for investment on the first day of the next month.

Fee Classes

Class 2 is a reportable class available to the general public. The portfolio has other fee classes available for investment.

Total Expense Ratio

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

Market Commentary

The All Share fell 4.8% in rands during May, breaking the trend of positive returns year to date. The rand weakened by 1.9% to 14.58, its weakest monthly close since October. Local equities followed global indices lower, while bonds and cash outperformed (ALBI +0.6% and STEFI +0.6%). Industrials were worst hit, ending the month down 6.1%. But Resources (-5.2%) and Financials (-2.3%) also ended the month in the red. Gold (+12.7%), Fixed Line Telcos (+8.2%) and Coal (+7.6%) were the key leaders whereas Chemicals (-21.7%) and Healthcare Equipment (-15.5%) were the key laggards.

The ANC won the 8 May national elections with 57% of the vote, broadly in line with consensus. On 28 May, President Ramaphosa announced the cabinet, reducing the number of ministers from 36 to 28. Finance Minister Mboweni and Public Enterprise Minister Gordhan kept their posts. The SARB published its Monetary Policy Review which kept the repo rate unchanged at 6.75%.

In May, SA equities had net foreign outflows of USD 0.32bn whereas SA bonds had a net inflow of USD 0.38bn. Cumulative inflows to EM bonds and equities YTD are now \$37.7bn and \$10.7bn, respectively. Capitec and Standard Bank were the most bought stock by foreigners, while AB Inbev and British American Tobacco were the most sold stocks.

The Assegai fund rose 0.1% in May. The largest positive contributions came from short positions in Massmart (+2.6%) and Brait (+2.6%). Massmart fell sharply after a profit warning, and Brait cut the value of some of their underlying investments. Long positions in Anglogold (+1.3%) and Fortress B (+1%) also contributed positively. Sasol fell sharply after they announced cost overruns at their LCCP project in the US; our long position in the stock detracted 2.7% from performance. Sappi also disappointed, and detracted 2.3% in May. A short position in Telkom and a long position in Qulter were the other large detractors in the month.

The fund has a large exposure to the resources sector, which increased slightly during the month. We again reduced exposure to the banking sector, as we have become increasingly concerned about the domestic economy. Exposure to Financials increased slightly, as we reduced some short positions in the sector; while Media sector exposure reduced, as the large Naspers long position was cut materially. Property sector exposure increased, as we bought in to the high quality domestic property names that are now offering compelling yield support.

Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges and maximum commissions, as well as a detailed description of how performance fees are calculated and applied, is available on request from Sanne Management Company (RF)(Pty) Ltd ("the Manager"). The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commission and incentives may be paid, and if so, are included in the overall costs. The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. Prices are published monthly on our website and local media. Additional information, including key investor information documents, minimum disclosure documents, as well as other information relating to the basis on which the manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. Where foreign investments are included in the portfolio, performance is further affected by uncertainties such as changes in government policy, political risks, tax risks, settlement risks, foreign exchange risks, and other legal or regulatory developments. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority under CISCA. The Manager retains full legal responsibility for the portfolio. FirstRand Bank Limited, is the appointed trustee. Fairtree Asset Management (Pty) Ltd, FSP No. 25917, is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services.
