

Fairtree Global Real Estate Prescient Fund Minimum Disclosure Document - Class A1

FUND OBJECTIVE

The Fairtree Global Real Estate Prescient Fund objective is to provide our clients access to high quality, international real estate assets that should benefit from capital appreciation while also delivering solid dividends in USD. We aim to outperform our index by analyzing the central economic and political drivers in the various geographies, identifying global property sector trends and studying the specific physical property market and equity fundamentals.

INVESTMENT POLICY

The portfolio has a long term focus, and is well diversified across geographic regions, currencies, real estate sectors and stocks. We will combine our top-down fundamental property market research with rigorous statistical valuation analysis using our proprietary models. We aim to lower portfolio volatility by adjusting the stocks and cash levels actively, while still outperforming our benchmark. We practice active risk management on a portfolio, sector and stock basis including the dynamic use of targets and stops. The fund will invest primarily in real estate equities in the United States, Japan, Hong Kong, Singapore, Australia, Europe and the UK.

Management and administration:	Prescient Management Company (RF) (Pty) Ltd
Valuation time of fund:	15:00
Transaction cut-off time:	15:00

RISK PROFILE

Risk Level: Aggressive

This portfolio is permitted to invest in foreign securities which, within portfolios, may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Investors are reminded that an investment in a currency other than their own may expose them to a foreign exchange risk.

PERFORMANCE SUMMARY

MARKET COMMENTARY

During April, we outperformed our index by 127bps* in a slightly weakening overall market. We did have a higher cash balance than normal going into the month on the back of our market caution after the index rallied 14.6% in USD during 1Q19 and appeared overbought. Following the consolidation, we have trimmed our cash position from 7% down to a more normal 3.5%, and shrunk our underweight position in Europe from 6% to 3% underweight.

During April, the top four contributors to performance were all from the US, which is perhaps unsurprising given the continued stellar economic data coming out of that geography. First was Prologis, the world's largest industrial property company, which rallied 6% and continues to do well on the back of the increased demand for industrial space from e-commerce. Second was Sun Communities, the manufactured housing supplier, which continues to benefit from the strong demand for affordable housing and recreational vehicle sites with limited supply available. Third was US Inland Empire industrial stock Rexford Industrial which rose 5% during the month on continued strong fundamentals and strong 1Q19 results.

On the negative side of the ledger, the largest detractor from performance was Deutsche Wohnen, which suffered from the dual challenges of a weaker German economy combined with the more specific challenges relating to street protests in their home market of Berlin related to residential rents being too high. While some of the more drastic requests such as the government buying back the residential units from the private holders are unlikely to materialize, measures such as further rental caps are certainly possible, and as a result we have reduced our weighting in German residential substantially. The second largest detractor from performance was Simon Property Group, which fell 5% on the back of weak 1Q19 core results relating to the continued challenges facing the retail property sector. The third largest detractor from performance was City Developments, the Singapore property developer, where fundamentals remain challenging with Singapore 1Q19 GDP growth expected to have fallen to 1.3%, the lowest since 2009.

Looking forward, we are comfortable with our underweight position in Europe, where the outlook for the economy remains challenging, and our overweight position in Singapore on the back of attractive valuations. We are slightly underweight Australia and Hong Kong after taking some profit in both markets after strong runs in the share prices, and are also slightly underweight in Japan. We are equal weight the UK, but via non-traditional sectors namely self-storage and industrials on the back of weak GDP growth and an uncertain outlook for Brexit. Within the US, our largest overweight remains residential, followed by industrial, datacentres and office, while we are underweight retail, lodging and healthcare.

*Commentary is based on USD returns, gross of investment charges, as at close of US markets (16h00 EST) on the last trading day of the month. This may differ from ZAR return, which is shown net of investment charges, as at 15:00 CAT on the last trading day of the month.

SPECIFIC RISK

- Default risk:** The risk that the issuers of fixed income instruments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.
- Derivatives risk:** The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a Fund. As such, large changes in value and potentially large financial losses could result.
- Developing Market (excluding SA) risk:** Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.
- Foreign Investment risk:** Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.
- Interest rate risk:** The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.
- Property risk:** Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.
- Currency exchange risk:** Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.
- Geographic / Sector risk:** For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.
- Derivative counterparty risk:** A counterparty to a derivative transaction may experience a breakdown in meeting its obligations thereby leading to financial loss.
- Liquidity risk:** If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.
- Equity investment risk:** Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

GLOSSARY

Annualised performance	Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.
Highest & Lowest return	The highest and lowest returns for any 1 year over the period since inception have been shown.
NAV	The net asset value represents the assets of a Fund less its liabilities.
Alpha	Denoted the outperformance of the fund over the benchmark.
Sharpe Ratio	The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.
Sortino Ratio	The Sortino Ratio is used to measure the risk-adjusted return of the fund.
Standard Deviation	The deviation of the return stream relative to its own average.
Max Drawdown	The maximum peak to trough loss suffered by the Fund since inception.
Max Gain	Largest increase in any single month.
% Positive Month	The percentage of months since inception where the Fund has delivered positive return.
Average Duration	The weighted average duration of all the underlying interest bearing instruments in the Fund.
Average Credit quality	The weighted average credit quality of all the underlying interest bearing instruments in the Fund (internally calculated).
Dividend Yield	The weighted average dividend yield of all the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.
PE Ratio	The weighted average price earnings ratio of all the underlying equity in the Fund. The price earnings ratio of each company is the price divided by the earnings per share.
High Water Mark	The highest level of performance achieved over a specified period.
Total Expense Ratio (TER%)	The Total Expense Ratio (TER) is the percentage of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product.
Performance fee incl. in TER (% PF (%))	The Performance Fee is a payment made to the Fund Manager for generating positive returns, and is generally calculated as a percentage of investment profits, often both realized and unrealized.
Transactions Costs (TC%)	The Transaction Costs (TC) is the percentage of the net asset value of the Financial Product incurred as costs relating to the buying and selling of the assets underlying the Financial Product.
Total Investment Charges (TIC%) = TER (%) + TC (%)	The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).

Trustees: Nedbank Trustees, Nedbank Investor Services, **Physical address:** 2nd Floor, 16 Constantia Boulevard, Constantia Kloof, Roodepoort, 1709. **Telephone number:** +27 11 534 6557 **Website:** www.nedbank.co.za

Investment Manager: Fairtree Asset Management (Pty) Ltd, **Registration number:** 2004/033269/07 is an authorised Financial Services Provider (FSP25917) under the Financial Advisory and Intermediary Services Act (No.37 of 2002), to act in the capacity as investment manager. This information is not advice, as defined in the Financial Advisory and Intermediary Services Act (No.37 of 2002). Please be advised that there may be representatives acting under supervision. **Physical address:** Willowbridge Place, Cnr. Carl Cronje and Old Oak Road, Bellville, 7530. **Postal address:** PO Box 4124, Tygervalley, 7536. **Telephone number:** +27 86 176 0760 **Website:** www.fairtree.com.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macro-economic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

This portfolio operates as a white label fund under the Prescient Unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
