

## FUND OBJECTIVE

The Fairtree Global Real Estate Prescient Fund objective is to provide our clients access to high quality, international real estate assets that should benefit from capital appreciation while also delivering solid dividends in USD. We aim to outperform our index by analyzing the central economic and political drivers in the various geographies, identifying global property sector trends and studying the specific physical property market and equity fundamentals.

## INVESTMENT POLICY

The portfolio has a long term focus, and is well diversified across geographic regions, currencies, real estate sectors and stocks. We will combine our top-down fundamental property market research with rigorous statistical valuation analysis using our proprietary models. We aim to lower portfolio volatility by adjusting the stocks and cash levels actively, while still outperforming our benchmark. We practice active risk management on a portfolio, sector and stock basis including the dynamic use of targets and stops. The fund will invest primarily in real estate equities in the United States, Japan, Hong Kong, Singapore, Australia, Europe and the UK.

Payment:	1st working day of April
Distribution Total for the past 12 months:	0.000 cents per unit
Management and administration:	Prescient Management Company (RF) (Pty) Ltd
Valuation time of fund:	15:00
Transaction cut-off time:	15:00

## RISK PROFILE

### Risk Level: Aggressive

This portfolio is permitted to invest in foreign securities which, within portfolios, may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Investors are reminded that an investment in a currency other than their own may expose them to a foreign exchange risk.

**GLOSSARY**

<b>Annualised performance</b>	Annualised performance shows longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.
<b>Highest &amp; Lowest return</b>	The highest and lowest returns for any 1 year over the period since inception have been shown.
<b>NAV</b>	The net asset value represents the assets of a Fund less its liabilities.
<b>Alpha</b>	Denoted the outperformance of the fund over the benchmark.
<b>Sharpe Ratio</b>	The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.
<b>Sortino Ratio</b>	The Sortino Ratio is used to measure the risk-adjusted return of the fund.
<b>Standard Deviation</b>	The deviation of the return stream relative to its own average.
<b>Max Drawdown</b>	The maximum peak to trough loss suffered by the Fund since inception.
<b>Max Gain</b>	Largest increase in any single month.
<b>% Positive Month</b>	The percentage of months since inception where the Fund has delivered positive return.
<b>Average Duration</b>	The weighted average duration of all the underlying interest bearing instruments in the Fund.
<b>Average Credit quality</b>	The weighted average credit quality of all the underlying interest bearing instruments in the Fund (internally calculated).
<b>Dividend Yield</b>	The weighted average dividend yield of all the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.
<b>PE Ratio</b>	The weighted average price earnings ratio of all the underlying equity in the Fund. The price earnings ratio of each company is the price divided by the earnings per share.
<b>High Water Mark</b>	The highest level of performance achieved over a specified period.
<b>Total Expense Ratio (TER%)</b>	The Total Expense Ratio (TER) is the percentage of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product.
<b>Performance fee incl. in TER (%) (PF%)</b>	The Performance Fee is a payment made to the Fund Manager for generating positive returns, and is generally calculated as a percentage of investment profits, often both realized and unrealized.
<b>Transactions Costs (TC%)</b>	The Transaction Costs (TC) is the percentage of the net asset value of the Financial Product incurred as costs relating to the buying and selling of the assets underlying the Financial Product.
<b>Total Investment Charges (TIC%) = (TER (%) + TC)</b>	The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).

**MARKET COMMENTARY**

The fund was down 135bps in ZAR for the month, outperforming our index\* by 18bps. It is a USD based fund and in that currency, was up 32bps.

The largest positive contributor to our outperformance were the Hong Kong stocks, a country we are overweight, with Sun Hung Kai Properties and Cheung Kong both up 8-10% for the month. Overweight sector bets in industrials and data centres again contributed positively to performance, with Prologis and Equinix both up around 4% for the month. Several of our European stocks also performed well for the month, with the USD performance aided by the 4% appreciation of the Euro.

These gains were for the second month running partially offset by the 5-6% fall in the share prices of our Japanese developers, Mitsubishi Estate and Mitsui Fudosan, and we have scaled back our exposure to these names as part of our risk management. As a result, we are now underweight Japan and will remain so while the political situation remains challenging, and Yen strength hits inflation, exports and therefore the economy. US retail mall operator GGP fell 7% for the month as management backed away from an earlier pledge to monetise assets, and we have exited the position as we remain concerned over the outlook for US malls and we remain underweight the sector. US healthcare stock HCP suffered from the departure of a few key staff members, falling 5%, and we have trimmed our position in favour of senior housing heavyweight Welltower.

Looking forward, we remain overweight Europe, Hong Kong and Singapore, and Japan joins our existing underweights in Australia and the US. From a sector perspective in the US, we have increased our overweight to the residential sector substantially, and it is now our largest overweight. We now own five names in the sector, with exposure to the multi-family, single-family rental and manufactured housing sub-sectors. We have increased our overweight to the industrial sector, adding a new position in DCT, and remain overweight data centres. We remain structurally underweight the lodging stocks on the back of perennial underperformance of the sector in the long-term. We are underweight triple net due to retail tenant concerns, and self-storage due to supply issues. We have a slightly elevated cash position going into September due to caution on the market in general.

Since inception on March 28, 2017 our fund is up 6.49% in USD, outperforming our index\* by 125bps.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macro-economic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
