

## Fairtree Flexible Income Plus Prescient Fund Minimum Disclosure Document - Class A1

29 February 2020

### FUND PROFILE

The portfolio is suited to investors who are seeking a high level of income with the tolerance for some capital volatility in the case of credit defaults. The portfolio is positioned as a multi-asset income portfolio to reflect the portfolio's flexible mandate in terms of accessing a broad spectrum of underlying high yielding assets including property and securities linked to equities with due consideration being given to the lower risk mandate for the portfolio, using appropriate strategies to minimize risk where necessary.

### INVESTMENT OBJECTIVE

The Fairtree Flexible Income Plus Prescient fund is a largely domestic, high yield, fixed income portfolio which aims to return STEFI + 3% after fees through the interest rate cycle. The Fund will aim to deliver a reasonable level of sustainable income and stability on capital invested.

### INVESTMENT POLICY

The fund will endeavour to protect capital and maximize income growth. In order to achieve this objective the fund will invest in interest bearing and non-equity securities (including, but not limited to, bonds, cash deposits and money market instruments) as well as SAFEX-listed non-equity derivatives, JSE-listed preference shares (which are of a debt nature) and assets in liquid form. In order to enhance income returns, the fund may also invest in non-equity securities such as Equity Linked Notes that are exposed to price movements in the equity markets, as well as derivative instruments, such as futures and options linked to the equity exposure of Equity Linked Notes and other similar instruments.

Management Company:	Prescient Management Company (RF) (Pty) Ltd
Valuation time of fund:	15:00
Transaction cut-off time:	15:00

### RISK PROFILE

#### Risk Level: Conservative

This portfolio is permitted to invest in foreign securities which, within portfolios, may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Investors are reminded that an investment in a currency other than their own may expose them to a foreign exchange risk.

Benchmark correlation (STeFi + 3%)	-0.03	(Monthly)

### Monthly and Cumulative Returns (Net of Fees)

**Please note:** Monthly return presented on the graph are rolling monthly returns.

### SPECIFIC RISK

- Default risk:** The risk that the issuers of fixed income instruments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.
- Derivatives risk:** The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a Fund. As such, large changes in value and potentially large financial losses could result.
- Developing Market (excluding SA) risk:** Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.
- Foreign Investment risk:** Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.
- Interest rate risk:** The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.
- Property risk:** Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.
- Currency exchange risk:** Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.
- Geographic / Sector risk:** For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.
- Derivative counterparty risk:** A counterparty to a derivative transaction may experience a breakdown in meeting its obligations thereby leading to financial loss.
- Liquidity risk:** If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.
- Equity investment risk:** Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

### GLOSSARY

<b>Annualised performance</b>	Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.
<b>Highest &amp; Lowest return</b>	The highest and lowest returns for any 1 year over the period since inception have been shown.
<b>NAV</b>	The net asset value represents the assets of a Fund less its liabilities.
<b>Alpha</b>	Denoted the outperformance of the fund over the benchmark.
<b>Sharpe Ratio</b>	The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.
<b>Sortino Ratio</b>	The Sortino Ratio is used to measure the risk-adjusted return of the fund.
<b>Standard Deviation</b>	The deviation of the return stream relative to its own average.
<b>Max Drawdown</b>	The maximum peak to trough loss suffered by the Fund since inception.
<b>Max Gain</b>	Largest increase in any single month.
<b>% Positive Month</b>	The percentage of months since inception where the Fund has delivered positive return.
<b>Average Duration</b>	The weighted average duration of all the underlying interest bearing instruments in the Fund.
<b>Average Credit quality</b>	The weighted average credit quality of all the underlying interest bearing instruments in the Fund (internally calculated).
<b>Dividend Yield</b>	The weighted average dividend yield of all the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.
<b>PE Ratio</b>	The weighted average price earnings ratio of all the underlying equity in the Fund. The price earnings ratio of each company is the price divided by the earnings per share.
<b>High Water Mark</b>	The highest level of performance achieved over a specified period.
<b>Total Expense Ratio (TER%)</b>	The Total Expense Ratio (TER) is the percentage of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product.
<b>Performance fee incl. in TER (%) PF (%)</b>	The Performance Fee is a payment made to the Fund Manager for generating positive returns, and is generally calculated as a percentage of investment profits, often both realized and unrealized
<b>Transactions Costs (TC%)</b>	The Transaction Costs (TC) is the percentage of the net asset value of the Financial Product incurred as costs relating to the buying and selling of the assets underlying the Financial Product.
<b>Total Investment Charges (TIC%) = TER (%) + TC (%)</b>	The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).

## DISCLAIMER

**Trustees:** Nedbank Trustees, Nedbank Investor Services, **Physical address:** 2nd Floor, 16 Constantia Boulevard, Constantia Kloof, Roodepoort, 1709. **Telephone number:** +27 11 534 6557 **Website:** www.nedbank.co.za

**Investment Manager:** Fairtree Asset Management (Pty) Ltd, **Registration number:** 2004/033269/07 is an authorised Financial Services Provider (FSP25917) under the Financial Advisory and Intermediary Services Act (No.37 of 2002), to act in the capacity as investment manager. This information is not advice, as defined in the Financial Advisory and Intermediary Services Act (No.37 of 2002). Please be advised that there may be representatives acting under supervision. **Physical address:** Willowbridge Place, Cnr. Carl Cronje and Old Oak Road, Bellville, 7530. **Postal address:** PO Box 4124, Tygervalley, 7536. **Telephone number:** +27 86 176 0760. **Website:** www.fairtree.com.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macro-economic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

This portfolio operates as a white label fund under the Prescient Unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.
