

## Fairtree Mokala Macro SNN QI Hedge Fund

Minimum Disclosure Document - Class 1

30 April 2020

### Fund Profile

The Fairtree Mokala Macro SNN QI Hedge Fund is a global macro multi-asset class portfolio. The long-term objective of the portfolio is to achieve superior risk adjusted returns through investment across a diverse set of investment strategies and asset classes. Although the portfolio aims to take advantage of macro economic themes, trends and investment opportunities globally, the majority of the risk is expressed in the South African equity market through an equity relative value strategy. A tactical risk allocation is expressed, from-time to-time, to the most attractive non-South African, macro economic opportunities on an ad-hoc basis. This tactical allocation is expressed across asset classes in developed markets. The portfolio combines the strategic, South African relative value risk with a tactical, ad-hoc risk allocation to provide optimal diversification benefits.

### Investment Strategy

The portfolio will combine a strategic risk allocation framework which provides the optimal diversification benefit across the various strategies, with tactical risk allocation to the most attractive opportunities as identified on a bottom up basis.

### Cumulative Performance Since Inception

Fund Source: Sanne Fund Services SA (Pty) Ltd as at April 2020

Index Source: Bloomberg as at April 2020

### Return Analysis (annualised)

	Fund	Standard Bank	All Share Index

\*The inception date for the portfolio is 1 June 2015. The historical performance figures until the end of 31 January 2017 reflect performance achieved prior to CISCA regulation. The portfolio has been transitioned under CISCA regulations on 1 February 2017 and has since been managed as a regulated product. The annualized total return is the average return earned by an investment each year over a given time period, since date of the launch of the fund. Actual annual figures are available from the manager on request. The highest and lowest 1 year returns represent the highest and lowest actual returns achieved during a 12 month rolling period year since the original launch date of the portfolio. The performance figures given show the yield on a Net Asset value ("NAV") basis. The yield figure is not a forecast. Performance is not guaranteed and investors should not accept it as representing expected future performance. Individual investor performance may differ as a result of initial fees, time of entry/actual investment date, date of reinvestment, and dividends withholding tax. Performance is calculated for a lump sum investment on a Net Asset Value basis. The performance figures are reported net of fees with income reinvested.

### Risk Profile

Risk Level: **Low**      **Low-Medium**      **Medium**      **Med-High**      **High**

The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including liquidity risk, credit risk, market risk, and settlement risk. Sanne Management Company (RF) (Pty) Ltd, ("the manager"), and the investment manager do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial adviser.

### Portfolio Valuation & Transaction Cut-Off

Portfolios are valued monthly. The cut off time for processing investment subscription is 10:00am on the last day of the month prior to enable processing for investment on the first day of the next month.

### Total Expense Ratio

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

### Market Commentary

April was the best month in the fund's history. Equity markets continued the recovery that started mid-March, with the JSE Capped Swix ending +14.2%. The US Federal Reserve Bank's unprecedented stimulus eased liquidity concerns and the 'don't fight the Fed' held as true as ever. The market also reacted positively to global covid-cases that plateaued, thanks to the various lockdown measures. The rally in equity markets seems extreme, since the severity of the economic impact of the virus and the interventions will only become clear in the next few years.

The fund benefited from a 50% move higher by Impala, as it became clear that they would be allowed to reopen mines on a gradual basis. Sasol (+136.3%) was a big detractor from the fund. Sasol will approach 6x net debt/EBITDA even if oil prices were to recover to \$30. They are under a lot of pressure to cut costs and sell their best assets in order to reduce the size of the rights issue needed. This will of course impact the long-term earnings potential of the company.

Naspers (+13.5%) enjoyed another strong month. Tencent benefited in the near-term from people staying home and playing games. In the long term, they benefit from the acceleration of structural trends to online advertising, and payments. Naspers is also making positive moves in the classified space, where they've announced more mergers. This adds scale to the segment, and will enable them to monetize more effectively. We hold a short position in Richemont (+7.6%) against our Naspers position, as consumers will cut back on luxury spending during the recession. Richemont has a largely fixed cost base, which means margins will come under pressure.

The fund enjoyed gains in the financial sector. PSG (+23.1%) announced that they are considering to unbundle a stake in Capitec to address the steep discount to sum-of-the-parts, as well as to avoid a potential increased regulatory burden. Absa (+30.3%) saw its share price rally, after the market realised that the conservative, profitable SA banks should not trade below 0.5 price/book. To hedge the SA Inc. risk, we hold a short position in Clicks (-10.5%). They delivered another strong set of results, but the counter was priced for perfection. The share price came under pressure after the market realised, that even Clicks won't be immune to the lockdown.

These are uncertain times, and we expect volatility to remain elevated. Although some economies are reopening, tensions between the United States and China are rising again. President Trump will look for someone to blame, and the Democrats are also jumping on the anti-China bandwagon. There is a good chance that the animosity will pick up as we approach the US presidential election, which will spook the markets. The fund is conservatively positioned, and ready to take advantage of any trading opportunities that might present themselves.

**Please Note:** The above commentary is based on reasonable assumptions and is not guaranteed to occur.

### Glossary

<b>Net Asset Value (NAV):</b>	Means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.
<b>Annualised Return:</b>	Is the weighted average compound growth rate over the performance period measured.
<b>Highest &amp; Lowest Return:</b>	The highest and lowest rolling twelve-month performance of the portfolio since inception.
<b>Total Expense Ratio (TER) :</b>	Reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.
<b>Transaction Costs (TC) :</b>	Is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.
<b>Total Investment Charges (TIC):</b>	Should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.
<b>Total Investment Charges (TIC%):</b>	= TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).
<b>Standard Deviation:</b>	The deviation of the return of the portfolio relative to its average.
<b>Drawdown:</b>	The greatest peak to trough loss until a new peak is reached.
<b>Sharpe Ratio:</b>	The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.
<b>Sortino Ratio:</b>	The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.
<b>Correlation:</b>	A number between -1 and 1 indicating the similarity of the dispersion of returns between the portfolio and another asset or index with 1 being highly correlated, -1 highly negatively correlated and 0 uncorrelated.
<b>Value at Risk (VaR):</b>	Value at risk is the minimum loss percentage that can be expected over a specified time period at a predetermined confidence level.

### Fund Risk

<b>Leverage Risk:</b>	The Fund borrows additional funds, trades on margin or performs short sale trades to amplify investment decisions. This means that the volatility of a hedge fund portfolio can be many times that of the underlying investments due to leverage on a fund.
<b>Derivative Risk:</b>	Derivative positions are financial instruments that derive their value from an underlying asset. Derivatives are exposed to implicit leverage which could result in magnified gains and/or losses on the portfolio.
<b>Counterparty Credit Risk:</b>	Counterparty risk is a type of credit risk and is the risk of default by the counterparty associated with trading derivative contracts. An example of counterparty credit risk is margin or collateral held with a prime broker.
<b>Volatility Risk:</b>	Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at risk (VaR) which is a statistical technique used to measure and quantify the level of volatility.
<b>Concentration and Sector Risk:</b>	A large proportion of total assets invested in specific assets, sectors or regions. Concentrated positions or concentrated sectors in a portfolio will material impact the returns of the portfolio more so than diversified portfolios.
<b>Correlation Risk:</b>	A measure that determines how assets move in relation to each other. Correlation risk arises when the correlation between asset-classes change. Correlation risk also arises when the correlation within an asset-class changes. Examples of correlation within asset classes include equity pairs trading, fixed income curve trading and commodities pairs trading.
<b>Equity Risk:</b>	Applies to investment in shares or derivatives based on shares. The market price of shares varies depending on supply and demand of the shares. Equity risk is the risk of loss due to the drop in the market price of shares. Equity risk can either be systematic risk which is risk to the entire market based on political and economic indicators or unsystematic risk which is company specific and includes risk relating to company profits, future prospects and general consensus on the company or sector.
<b>Currency/Exchange Rate Risk :</b>	Assets of a fund may be denominated in a currency other than the Base Currency of the fund and changes in the exchange rate between the Base Currency and the currency of the asset may lead to a depreciation of the value of the fund's assets as expressed in the Base Currency.

### Mandatory Disclosures

**Investment Manager:** Fairtree Asset Management (Pty) Ltd, **Registration Number:** 2004/033269/07 is an authorised Financial Services Provider (FSP25917) under the Financial Advisory and Intermediary Services Act (No.37 of 2002), to act in the capacity as investment manager. This information is not advice, as defined in the Financial Advisory and Intermediary Services Act (No.37 of 2002). Please be advised that there may be representatives acting under supervision. **Physical Address:** Willowbridge Place, Cnr. Carl Cronje and Old Oak Road, Bellville, 7530. **Postal Address:** PO Box 4124, Tygervalley, 7536. **Telephone Number:** +27 86 176 0760. **Website:** www.fairtree.com.

**Management Company:** Sanne Management Company (RF) (Pty) Ltd (the "Manager"), **Registration Number:** 2013/096377/07, is authorised in terms of the Collective Investment Schemes Control Act (CISCA) to administer Collective Investment Schemes (CIS). **Physical Address:** Pier Place, Heerengracht Street, Foreshore, Cape Town, South Africa. **Telephone Number:** +27 21 202 8282. **Website:** www.snnmanco.com, **Trustee:** FirstRand Bank Limited, (acting through its RMB Custody and Trustee Services Division). **Physical Address:** 3 Merchant Place, Ground Floor, Corner Fredman and Gwen Streets, Sandton, 2146, **Telephone:** +27 87 736 1732.

Collective Investment Schemes are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges and maximum commissions, as well as a detailed description of how performance fees are calculated and applied, is available on request from Sanne Management Company (RF)(Pty) Ltd ("the Manager"). The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commission and incentives may be paid, and if so, are included in the overall costs. The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. Prices are published monthly on our website and local media. Additional information, including key investor information documents, minimum disclosure documents, as well as other information relating to the basis on which the manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. Where foreign investments are included in the portfolio, performance is further affected by uncertainties such as changes in government policy, political risks, tax risks, settlement risks, foreign exchange risks, and other legal or regulatory developments. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority under CISCA. The Manager retains full legal responsibility for the portfolio. FirstRand Bank Limited, is the appointed trustee. Fairtree Asset Management (Pty) Ltd, FSP No. 25917, is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services.
